PROFESSIONAL EXPERIENCE

ICT Assistant Manager | Magunas Supa Store— Nairobi, Kenya | December 2025 – Present

- Manage and maintain the organization's network infrastructure, including routers, switches, wireless access points, and internet connectivity.
- Monitor network performance and troubleshoot connectivity issues to ensure reliable and secure communication across departments.
- Configure and administer LAN, WAN, Wi-Fi, TCP/IP, DHCP, DNS, and VPN services to support daily business operations.
- Provide technical support for network-related hardware and software issues, minimizing downtime and ensuring business continuity.
- Implement and maintain network security measures, including firewalls, endpoint protection, access controls, and security updates.
- Perform network monitoring, system backups, and disaster recovery procedures to maintain data availability and integrity.
- Support the deployment, maintenance, and upgrade of network devices, servers, and ICT infrastructure while ensuring compliance with organizational ICT policies.

Data Analyst Intern | Safaricom PLC — Nairobi, Kenya | January 2025 – June 2025

- Collected, cleaned, and analyzed large datasets using Excel and SQL to support business reporting and operational decision-making.
- Developed dashboards and reports to monitor key performance indicators (KPIs) and identify business trends.
- Performed data validation and quality assurance to ensure the accuracy and consistency of organizational data.
- Assisted in automating recurring reports, reducing manual processing time and improving reporting efficiency.
- Worked with cross-functional teams to gather business requirements and translate them into meaningful data insights.
- Generated analytical reports and visualizations to support strategic planning and performance evaluation.
- Participated in database querying, data extraction, and report generation using SQL.

ICT Intern| Consolidated Bank of Kenya — Nairobi, Kenya | August 2024 – October 2024

- Provided first-line technical support by troubleshooting hardware, software, printer, and network-related issues for staff across departments.
- Assisted in configuring, maintaining, and monitoring computer systems, user accounts, and network devices to ensure smooth operations.
- Supported the installation, upgrade, and maintenance of operating systems, business applications, and security software.
- Monitored network connectivity and assisted in diagnosing LAN, Wi-Fi, and internet-related issues.
- Performed routine system maintenance, backups, and data recovery tasks to support business continuity.
- Assisted in implementing ICT security measures, including user access management, antivirus updates, and compliance with ICT policies.

- Provided first-line ICT support by troubleshooting hardware, software, printer, and network-related issues across departments.
- Installed, configured, and maintained desktop computers, laptops, operating systems, and business applications.
- Assisted in administering user accounts, password resets, and access permissions using Active Directory.
- Monitored and maintained LAN, Wi-Fi, TCP/IP, DNS, and DHCP services to ensure reliable network connectivity.
- Performed routine system maintenance, software updates, antivirus management, and security patch installations.
- Supported data backup, recovery, and disaster recovery procedures to ensure business continuity.
- Maintained ICT asset inventories, documented technical issues, and prepared support reports for the ICT department.
- Collaborated with senior ICT staff during system upgrades, network installations, and infrastructure improvement projects.
- Assisted users with Microsoft 365 applications, email configuration, and productivity software support.
- Ensured compliance with organizational ICT security policies and best practices while maintaining confidentiality of company data.
